

What can we Offer?

EcoConsulting can assist you through every step of the CRC process:

- Seminars on CRC.
- Applicability of CRC: Initial appraisal of whether your company is affected by the CRC scheme.
- CRC impact assessment: What impact will the CRC have on your business?
- Energy & Carbon Accounting: Detailed analysis to all energy uses on all sites and buildings.
- Opportunity Identification: Energy efficiency and renewable energy options for each and every site/building.
- Management Consultancy on Carbon Reduction: Develop and implement an energy strategy to reduce carbon emissions and optimise position in the annual league tables.
- Carbon Trading and Brokerage: Via our specialist partners in emissions trading

Carbon Reduction Commitment

EcoConsulting is pleased to offer key services to public and private organisations affected by the new Carbon Reduction Commitment (CRC) Scheme, which is coming into effect in April 2010.

CRC Overview

What is it?

- A new mandatory trading scheme commencing April 2010
- Will directly affect approximately 5,000 UK companies
- Another 15,000 or so will be subject to partial participation

How it works?

- Participants will be required to buy carbon allowances to cover their forecasted carbon emissions.
- The Carbon Allowance price during the introductory phase (April 2010- March 2013) will be fixed at £12/ton of CO₂ and there will be no limit on the number of Allowances an organisation can buy.
- In all subsequent phases however, there will be a cap on the total number of Carbon Allowances available for purchase and their price and quantity will be set using a bid submission and auction process.
- Participants will need to complete the following steps (EA, 2009):
 - *At the beginning and during each compliance year, purchase allowances based on expected energy use*
 - *Monitor energy use during each scheme year and by the end of the scheme year, report CRC emissions to the administrator.*
 - *By the end of July, surrender allowances equal to emissions during that year.*
 - *Receive a revenue recycling payment from the Government, based on relative performance in the scheme as published in a Performance League Table.*

Are you affected?

The flow chart below helps you assess whether you are fully affected by the CRC Scheme, partially affected, or not affected at all.
